MOMENTS

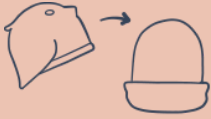

TEKST

IN THIS MANUAL

1. How does the night light work?
2. How to charge your night light
3. What to do when you're having trouble charging your light
4. Features
5. Materials & safety information

HOW DOES THE NIGHT LIGHT WORK?

Choose your favorite Yumi Yay character and place it on the night light.

Turn the head of the night light to switch it on.

When you turn on the night light it's in night mode and it will shine all night long.

Tap the night light once and it will automatically switch off after 40 minutes.

Tap the night light twice and it will automatically switch off after 20 minutes.

Tap the night light a third time and it will be in night mode again.

Make sure to turn off the night light when it switched off automatically!

HOW TO CHARGE YOUR NIGHT LIGHT

1. When the night light turns red it needs to be charged.
2. Connect the USB-cable with the Yumi Yay charging nest and the charger.
3. Plug it into the socket/outlet.
4. Place the night light on the charging nest.
5. Wait for the light to turn on; then you'll know it's charging.
6. After 3 hours the night light is charged. Now it's ready to shine for about 20h in night mode!
7. Turn on the night light by turning the head of the light.

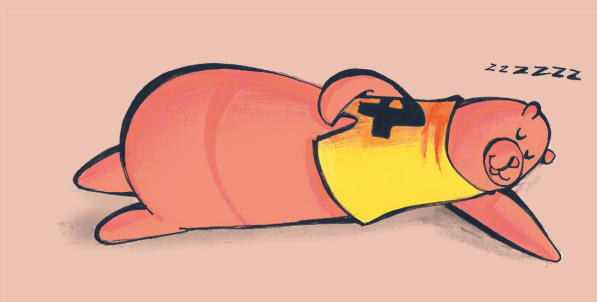

WHAT TO DO WHEN YOU'RE HAVING TROUBLE CHARGING YOUR NIGHT LIGHT

In case the night light doesn't light up, it's probably tired. zzz

It also might help trying one of the next tips:

- check if the cables are plugged in correctly into the nest/charger,
- try another socket,
- try another plug/charger,
- try another USB-cable,
- try charging the night light with a laptop.
